

WEEKLY UPDATE

September 8, 2021

Dear Residents and Families/Representatives:

Please accept this letter as Northampton Manor's weekly update to keep you informed about the status of COVID in our facility and what we are doing to keep our residents and staff safe during the ongoing coronavirus pandemic.

Since our last update we have had no new staff members or residents test positive for COVID-19. The last staff member to test positive was on March 16, 2021.

"It's a New Day at Northampton"

We continue to have the doors to the main entrance open between 9 am and 4:30 pm every day. All visitors are screened when they come in. If you would like to leave after 4:30pm, please have a staff member assist you to exit the building.

The weekly positivity rate has decreased to **7.6%**. We will finish testing all staff members 2x/week this week and will begin testing weekly on 9/13/21 per CDC/CMS guidance. We have completed 200 staff tests and 5 new admissions. All tests have been negative. Per MDH guidance and CMS recommendation we are only required to test those staff members who aren't fully vaccinated but we feel we need to test all staff as an added layer of precaution. We will continue to test residents and staff if they are displaying any signs or symptoms of Covid-19. This week 1 staff and 0 residents were tested. The staff test was negative. Per CMS and CDC recommendations, all new admissions are tested and only those new admissions that are unvaccinated are assigned to a room on the observation unit for 14 days. Small group activities continue and are being well attended. The beauty shop continues to provide services to all of our residents.

We continue to encourage vaccinations of all of our staff and residents. As of this time 87% of our staff and 87% of our residents are fully vaccinated. We have an additional 14 staff members who have received the 1st dose in their vaccination series.

We also continue to implement and practice enhanced safety precautions recommended by our federal, state and local health officials, performing regular screenings for signs and symptoms of illness prior to entering the building, continually monitoring residents, performing regular deep cleanings, using PPE as recommended by the CDC, implementing isolation protocols as required and reminding and encouraging staff to practice social distancing, use hand sanitizer and frequently wash their hands when they are in the facility and out in the community. We ask them not to report to work if they have symptoms of illness.

Please continue to check our website for updates. As always, we will notify you if we receive confirmation of a new positive case in our facility and we will reach out to you individually if your loved one is displaying symptoms of COVID-19 or tests positive for COVID-19.

If you have any questions or concerns please contact us directly at 301-662-8700.

Sincerely,

Mark McElwee
